

Mudge Quarter Repeating Watch

Acquisition of a grande-sonnerie quarter repeating watch, c 1756-7, believed to have been made to fit into the end of a walking cane head. At a later date, possibly as early as 1842, the watch was rehoused in a gold basket.

Nation/region

London

Grant awarded

£40,000

Award date

21/05/1996
